Professional Profile

Techno-Functional **SAP TM Consultant** with a **B.Tech in CSE (Artificial Intelligence)**. I leverage a strong engineering foundation in data structures and logic to bridge the gap between logistics business processes and technical system architecture.

Currently deployed on an active implementation project at **NBSAM IT Solution**, specializing in **S/4HANA Embedded TM**, Freight Order Management, and Charge Calculation. Uniquely capable of utilizing **BOPF framework** logic and basic debugging skills to accelerate issue resolution and support technical teams.

Technical & Functional Skills

SAP TM Functional: S/4HANA Embedded TM (1909/2020+), Freight Order (FO) & Freight Unit (FU) Management, Transportation Network (Zones/Lanes), Charge Management (TCM), Carrier Selection, Planning Profiles.

Technical SAP: BOPF Framework (Business Object Processing Framework), BRF+ (Business Rule Framework), NWBC / Fiori App Navigation, Basic ABAP Debugging, Master Data Validation.

Programming & Database: Python, SQL, Java, C++ (Strong foundation from CSE background).

Tools & Testing: Unit Testing, Integration Testing (SIT), HP ALM / JIRA (Defect Tracking), MS Excel (Advanced Lookup/Pivot).

Professional Experience

Associate SAP TM Consultant   **Sept 2025 – Present**
NBSAM IT Solution Pvt Ltd   *Hyderabad, India*

Project: Implementation & Support for Logistics Client

- **Configuration & Setup:** Supporting the configuration of Freight Order types and Transportation Lanes. Managing daily planning runs using Selection Profiles to ensure optimal load consolidation.

- **Testing Lead (Outbound):** Executing 50+ End-to-End (E2E) test scripts for Outbound Logistics scenarios. Identified and resolved 10+ critical master data errors (Business Partners/Locations) before UAT cycles.

- **Techno-Functional Analysis:** Utilizing CSE background to analyze BOPF consistency checks. Collaborated with ABAP developers to explain functional logic for custom developments, reducing development turnaround time.

- **Charge Management Support:** Assisted in defining Rate Tables and Calculation Sheets to ensure accurate freight costing for road carriers. Validated Scale determinations against client contracts.

- **Documentation:** Created detailed Standard Operating Procedures (SOPs) and User Manuals for the "Freight Planning" Fiori apps to assist end-users during training.

Education

B.Tech(H) in Computer Science & Engineering (Artificial Intelligence)   Graduated 2025
Chhattisgarh Swami Vivekanand Technical University   *Bhilai, Chhattisgarh*

Relevant Coursework:

- Database Management Systems (DBMS) & SQL
- Data Structures & Algorithms (DSA)
- Object-Oriented Programming (OOP)

Relevance to SAP: My academic focus on database logic and algorithm optimization allows me to understand SAP's table structures and planning algorithms faster than traditional functional consultants.

Key Competencies

- **Problem Solving:** Ability to break down complex system errors into logical steps.
- **Collaboration:** Bridging the communication gap between technical coders and business users.
- **Adaptability:** Rapidly upskilled from pure coding to SAP functional configuration in 4 months.
